Carol Murphy, Registration Co-Chair
Sharon Duke, Registration Co-Chair

CONFERENCE OVERVIEW

The Louisiana section of the Air & Waste Management Association is pleased to present another outstanding fall conference program for our membership and our environmental colleagues. Environmental Focus 2005: A Multi-Media Forum provides the very latest information on issues facing the regulated environmental community.

The fall conference, planned in cooperation with the Louisiana Department of Environmental Quality (LDEQ), has become a much anticipated yearly event. Building on the successes of conferences of the past, this year's conference is again structured as a multi-day event featuring presentations on a variety of important local, regional and national environmental issues. In addition to key regulatory agency topics, the program also includes timely topics resulting from the recent hurricane events that have so dramatically affected our region. Further, we have included other timely topics resulting from a call for abstracts. The program that has been developed contains something for everyone, whether you register for the entire program or elect for a daily registration.

The program will open on Tuesday morning with a focus on the recent catastrophes resulting from Hurricanes Katrina and Rita. The morning session will feature speakers from the LDEQ, the Environmental Protection Agency (EPA) and industry discussing their responses to these disasters as well as the resulting environmental impacts including regulated activities and the handling of these issues. For the lunchtime and Louisiana Section's fall dinner speakers, we have invited representatives from the Baton Rouge Mayor's office and

BATON ROUGE, LA**

from the Louisiana Department of Economic Development to also discuss relevant local and federal impacts and initiatives resulting from Hurricanes Katrina and Rita. The Tuesday afternoon session will be rounded out with updates on enforcement issues from EPA, updates regarding relevant LDEQ programs (Permit Procedure Manual, EIS, TEMPO), updates on the ethics law, as well as presentations from abstract submittals including federal requirements resulting from compliance programs and homeland security challenges. At the conclusion of the Tuesday session, please join us for a social hour and the Louisiana Section's fall dinner meeting.

Wednesday's program will feature a dual-track format with two full-day sessions adjourning at 3:30pm. Sessions 3 and 5 on Wednesday morning and afternoon, respectively, will cover Multi-Media issues. Sessions 4 and 6 on Wednesday morning and afternoon, respectively, will cover Current Air Issues, including an update on NSR Reform.

The Multi-Media Sessions include updates to the solid waste rules, NSPS Subpart YYY, and phytoremediation of arsenic contaminated soils. Discussions and abstracts will be presented on CAIR and Utility MACT issues as well as on RCRA regulatory issues (comparable fuels exclusion and Hazardous Waste Combustor MACT). Further, presentations will be given on HAWK/Ambient Monitoring Compliance Orders.

The Current Air Issues Session includes ozone issues and strategies, discussions and abstracts presented on HRVOC measurements, AERMOD modeling guidance, MON Settlement, and Residual Risk. The New Source Review (NSR) Reform Session will provide updates with discussions and abstracts presented on NSR litigation and implications as well as case examples under NSR and a step-by-step guide to reaping the benefits.
